

Samantha Liu
ARTF 1122
2D Fundamentals: Surface/Drawing
Fall 2019

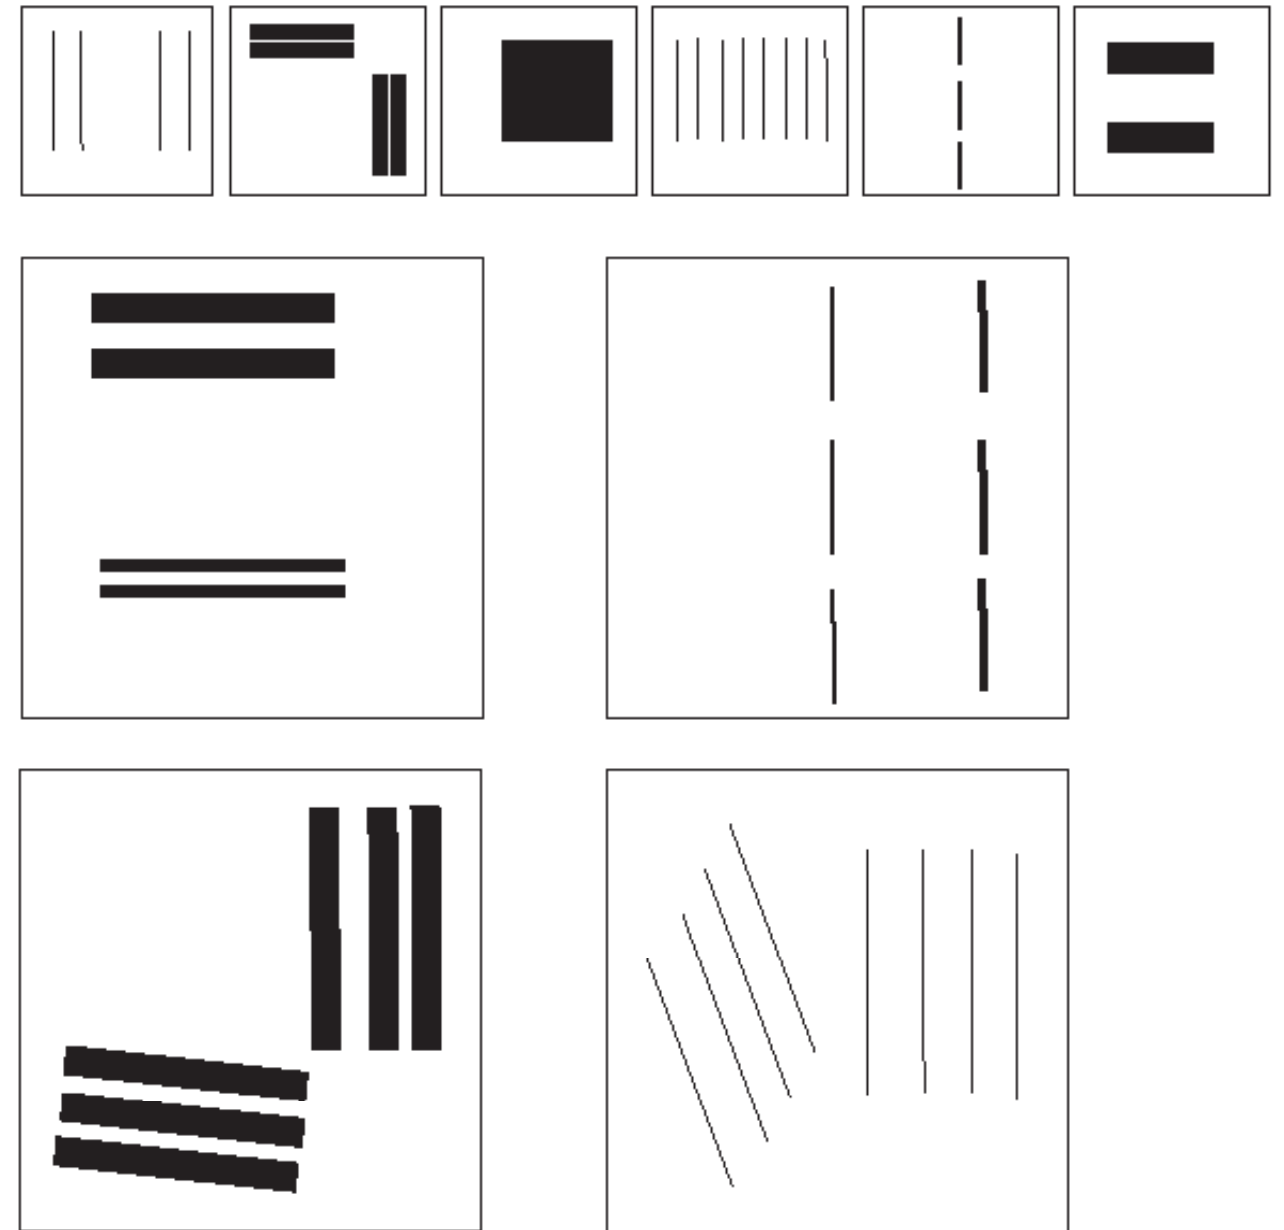

The 7 by 6 squares have dots that are supposed to show proximity. Proximity indicates that items are connected when they are close to each other. My second take on these proximity dots are shown in the 18 by 18 squares.

Proximity Lines

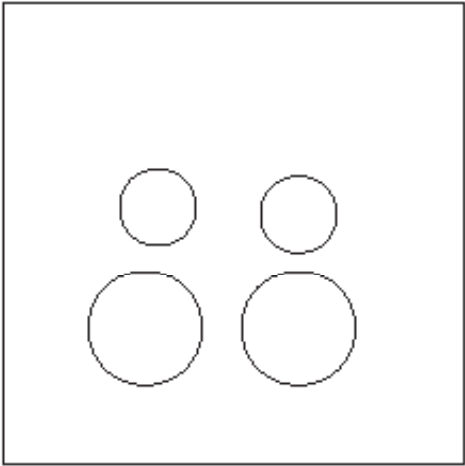

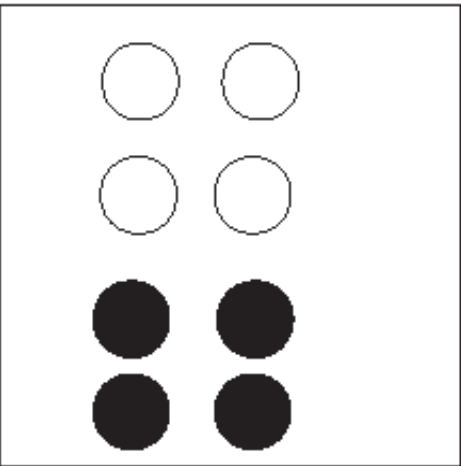

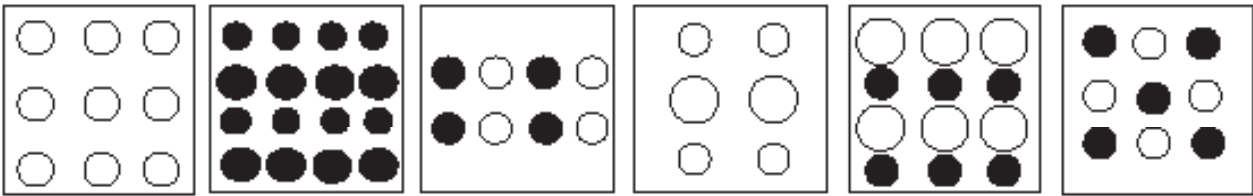

This is my final proximity dot assignment. The dots are placed in close proximity, which means that these dots are connected or have a relationship to each other. It is visible that there is a column of white dots to the left and a column of black dots to the right.

The 7 by 6 squares have lines that are supposed to show proximity. There are various line thickness used to show proximity. My second take on these proximity lines are shown in the 18 by 18 squares.

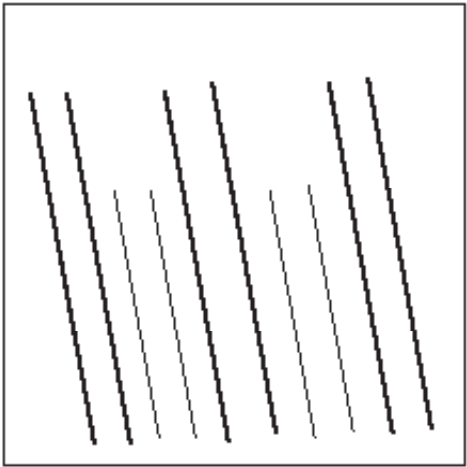

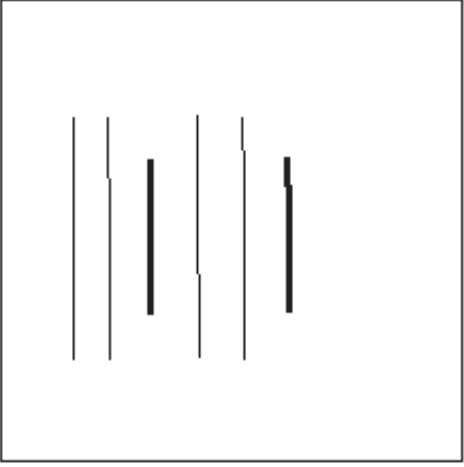

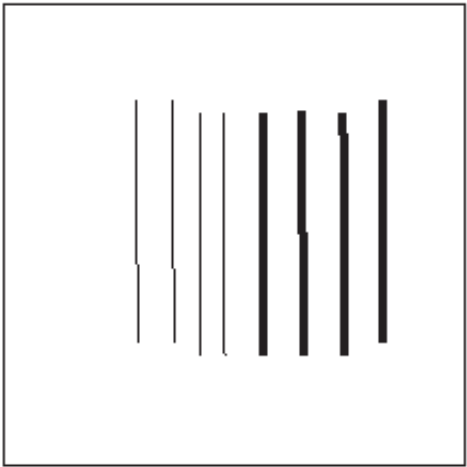

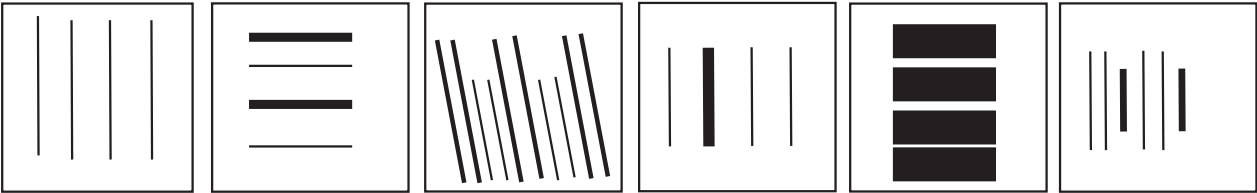

This is my final proximity line assignment. The lines are also placed in close proximity, like the proximity dots. In this final study, there are two lines to the left and thicker set of lines to the right.

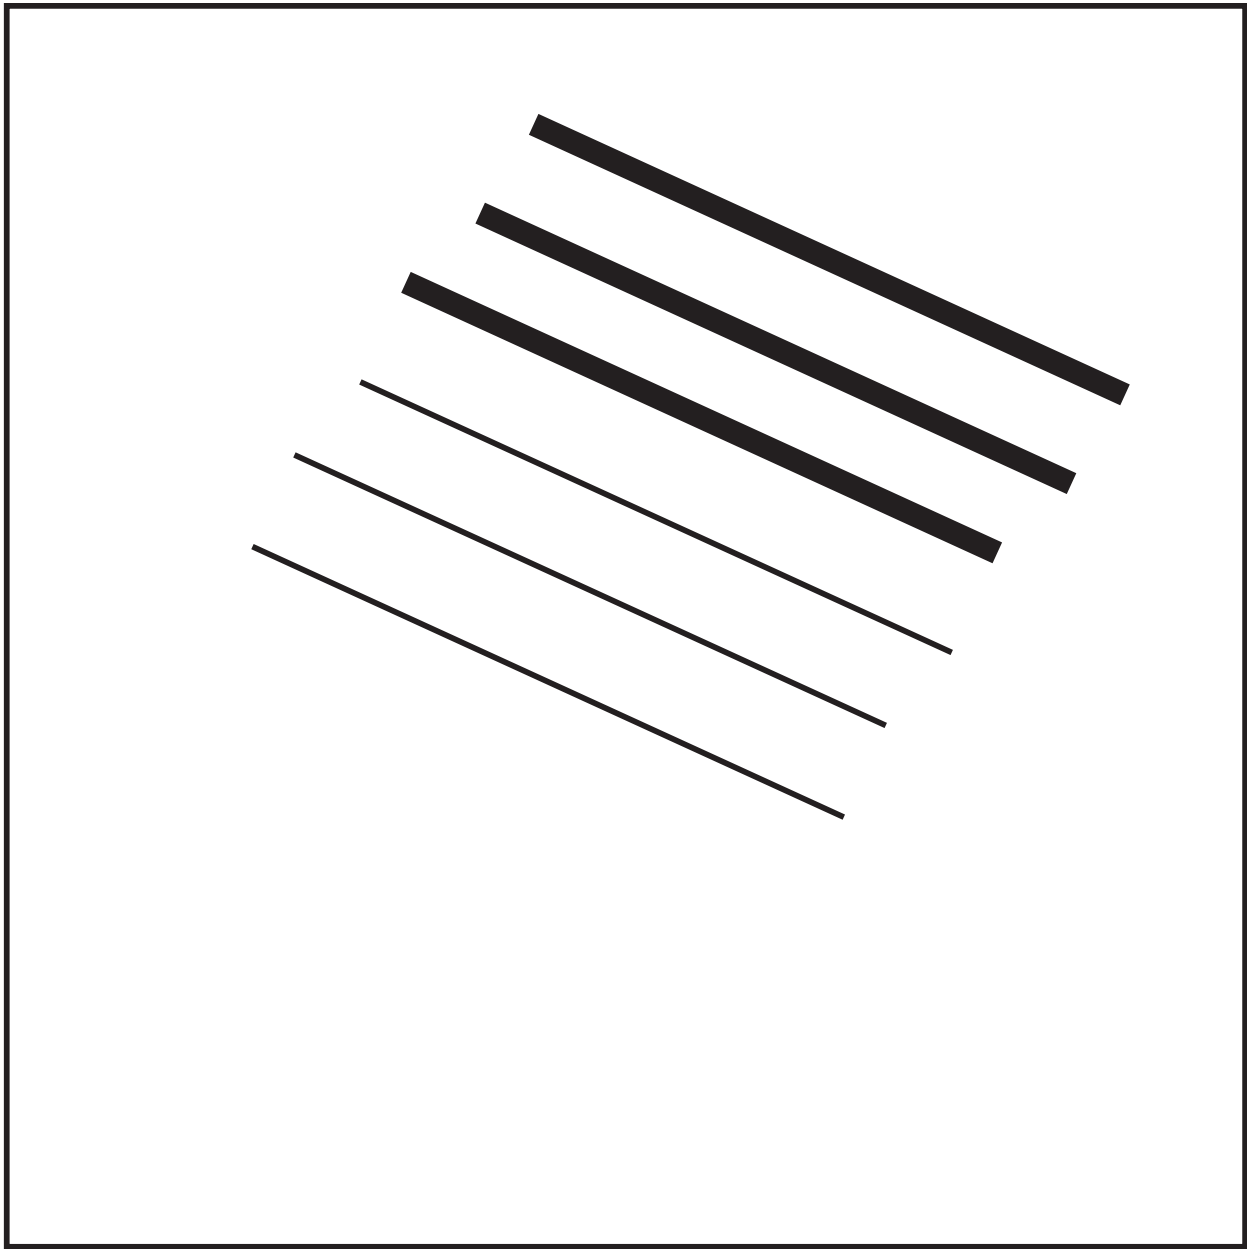

The 7 by 6 squares have dots that are supposed to show similarity. Similarity shows common characteristics and elements in objects. My second take on these similarity dots are shown in the 18 by 18 squares.

This is my final similarity dot assignment.
The white dots and black dots are placed
in a certain way that show that two objects
have similar characteristics.

The 7 by 6 squares have lines that are sup-
posed to show similarity. There aer various
sizes and lengths of lines that are shown on
this page. My second take on these similar-
ity lines are shown in the 18 by 18 squares.

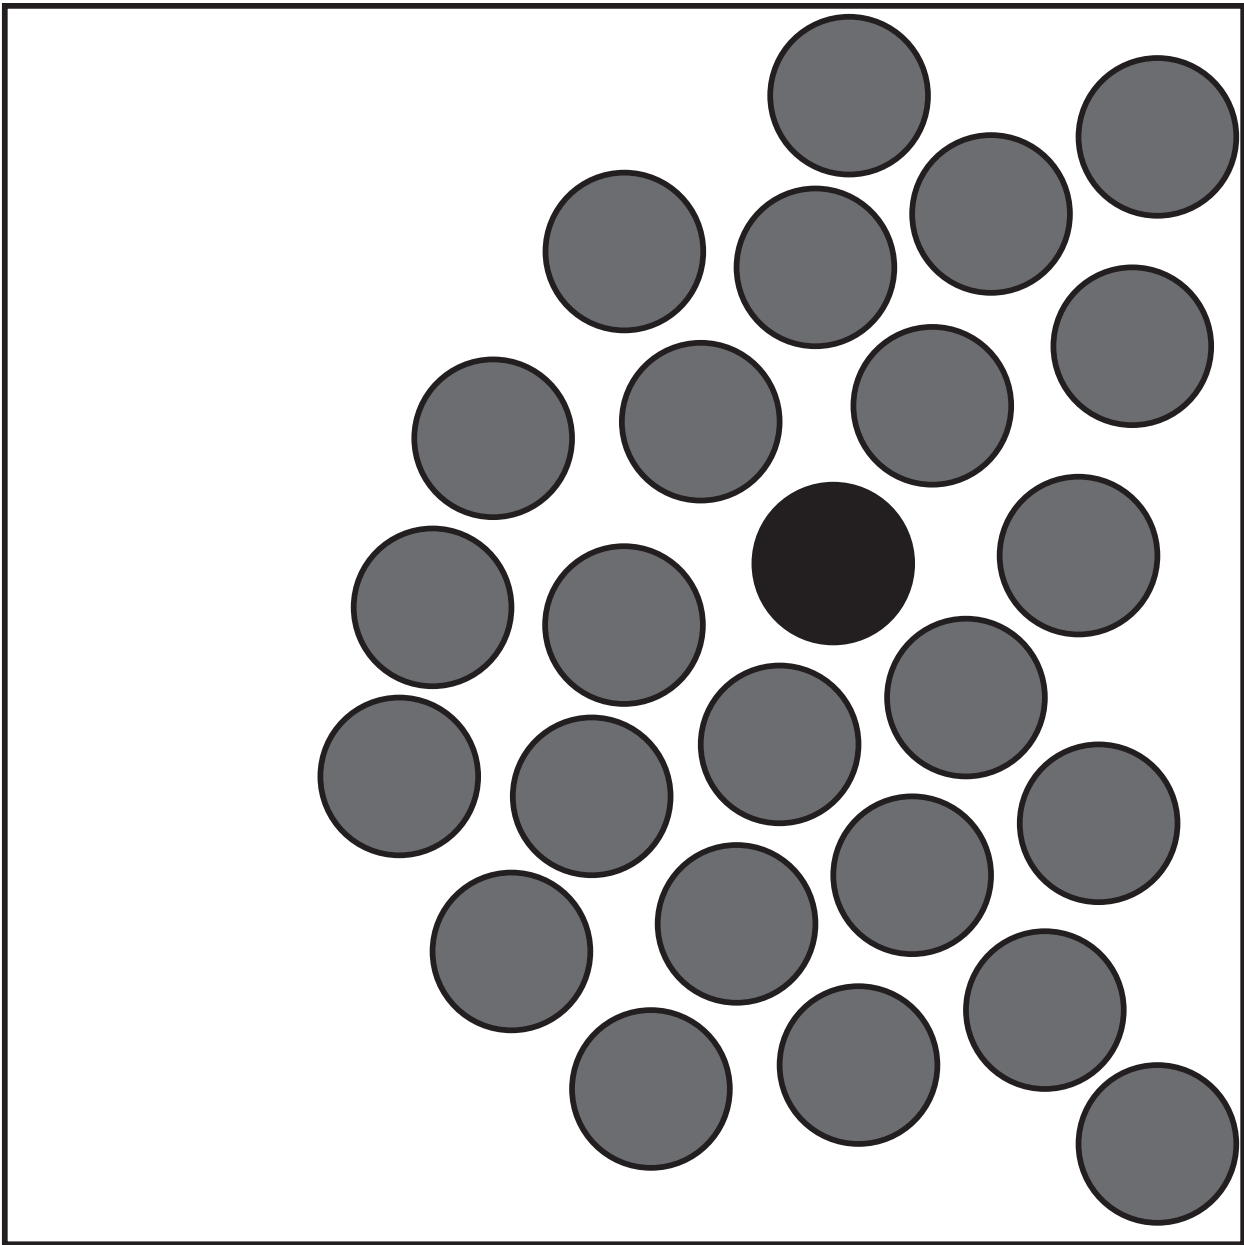

This is my final similarity line assignment. The two types of lines are placed in a certain way to emphasize the similarity between the lines.

Contrast Dots

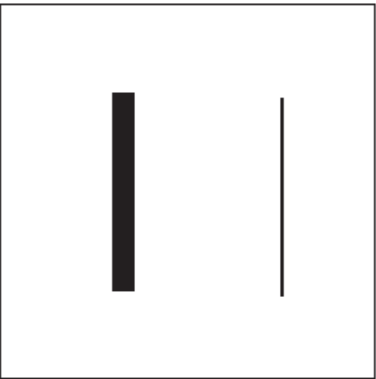

The first set of squares is my first draft for contrast dots. The constraint of this assignment was to show contrast only using dots. The second set of squares (18 by 18) show my second draft for contrast dots.

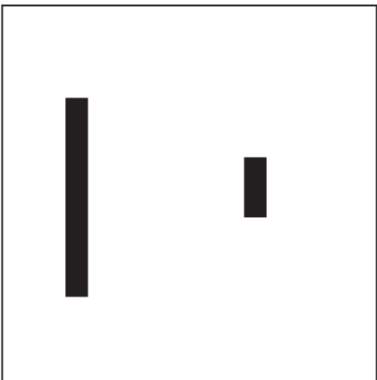

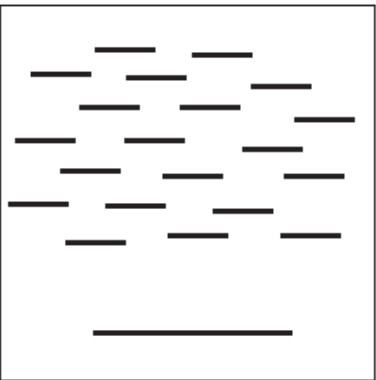

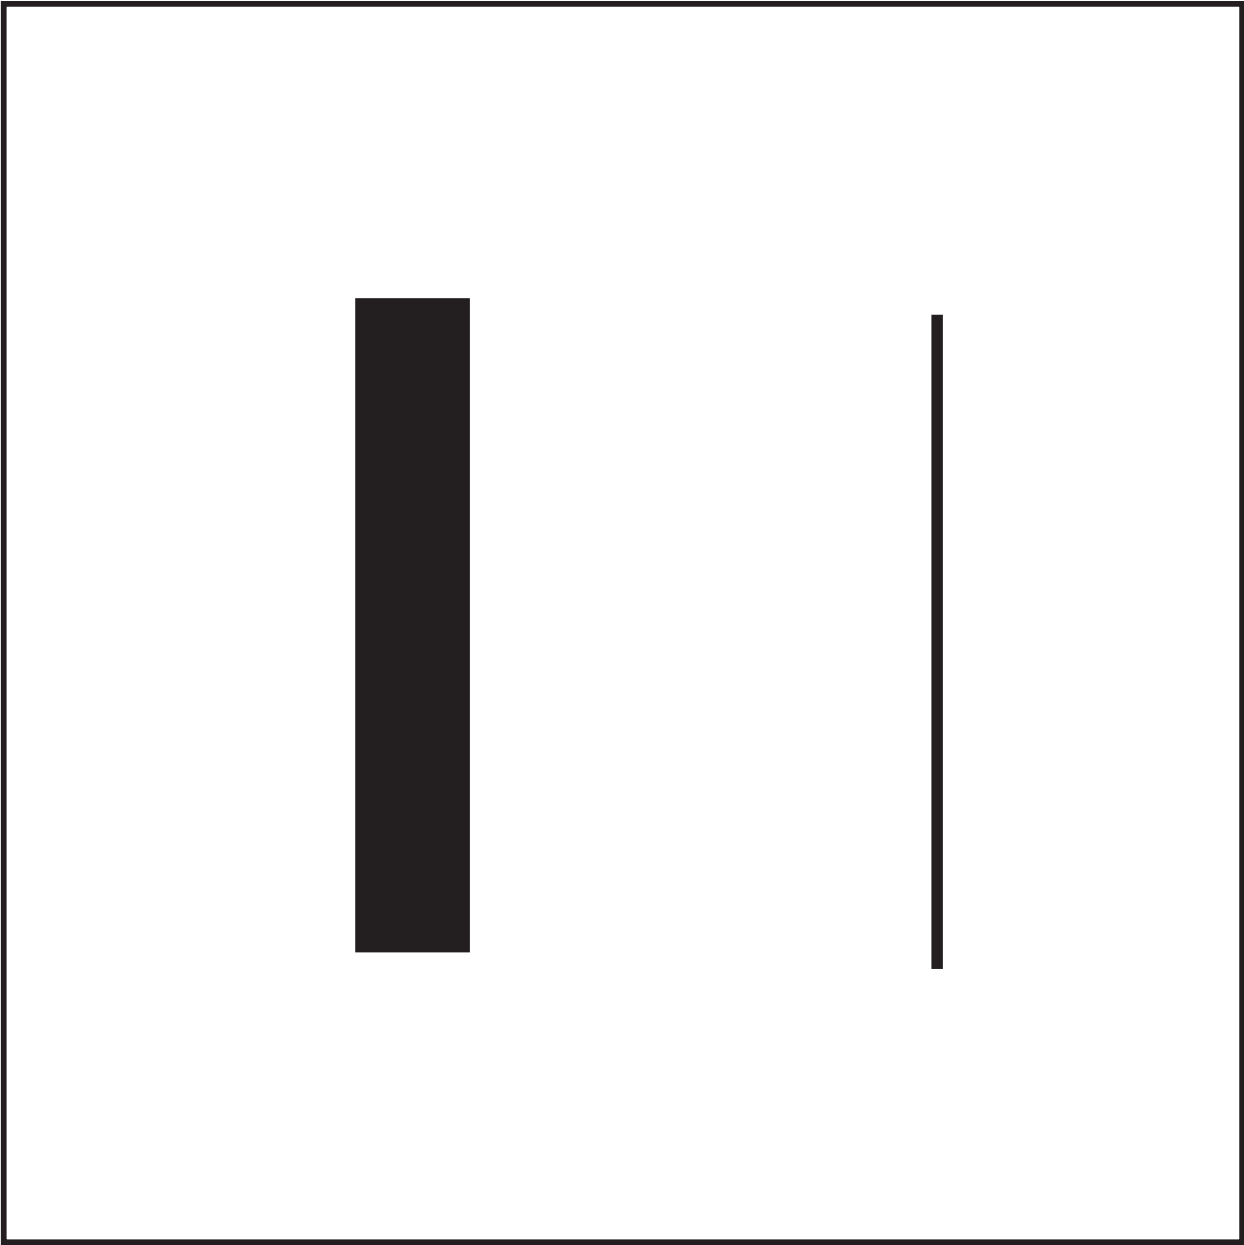

This is my final contrast dots assignment. I used many gray dots and one black dot to show contrast. Contrast is shown when two elements on a page are different.

Contrast Lines

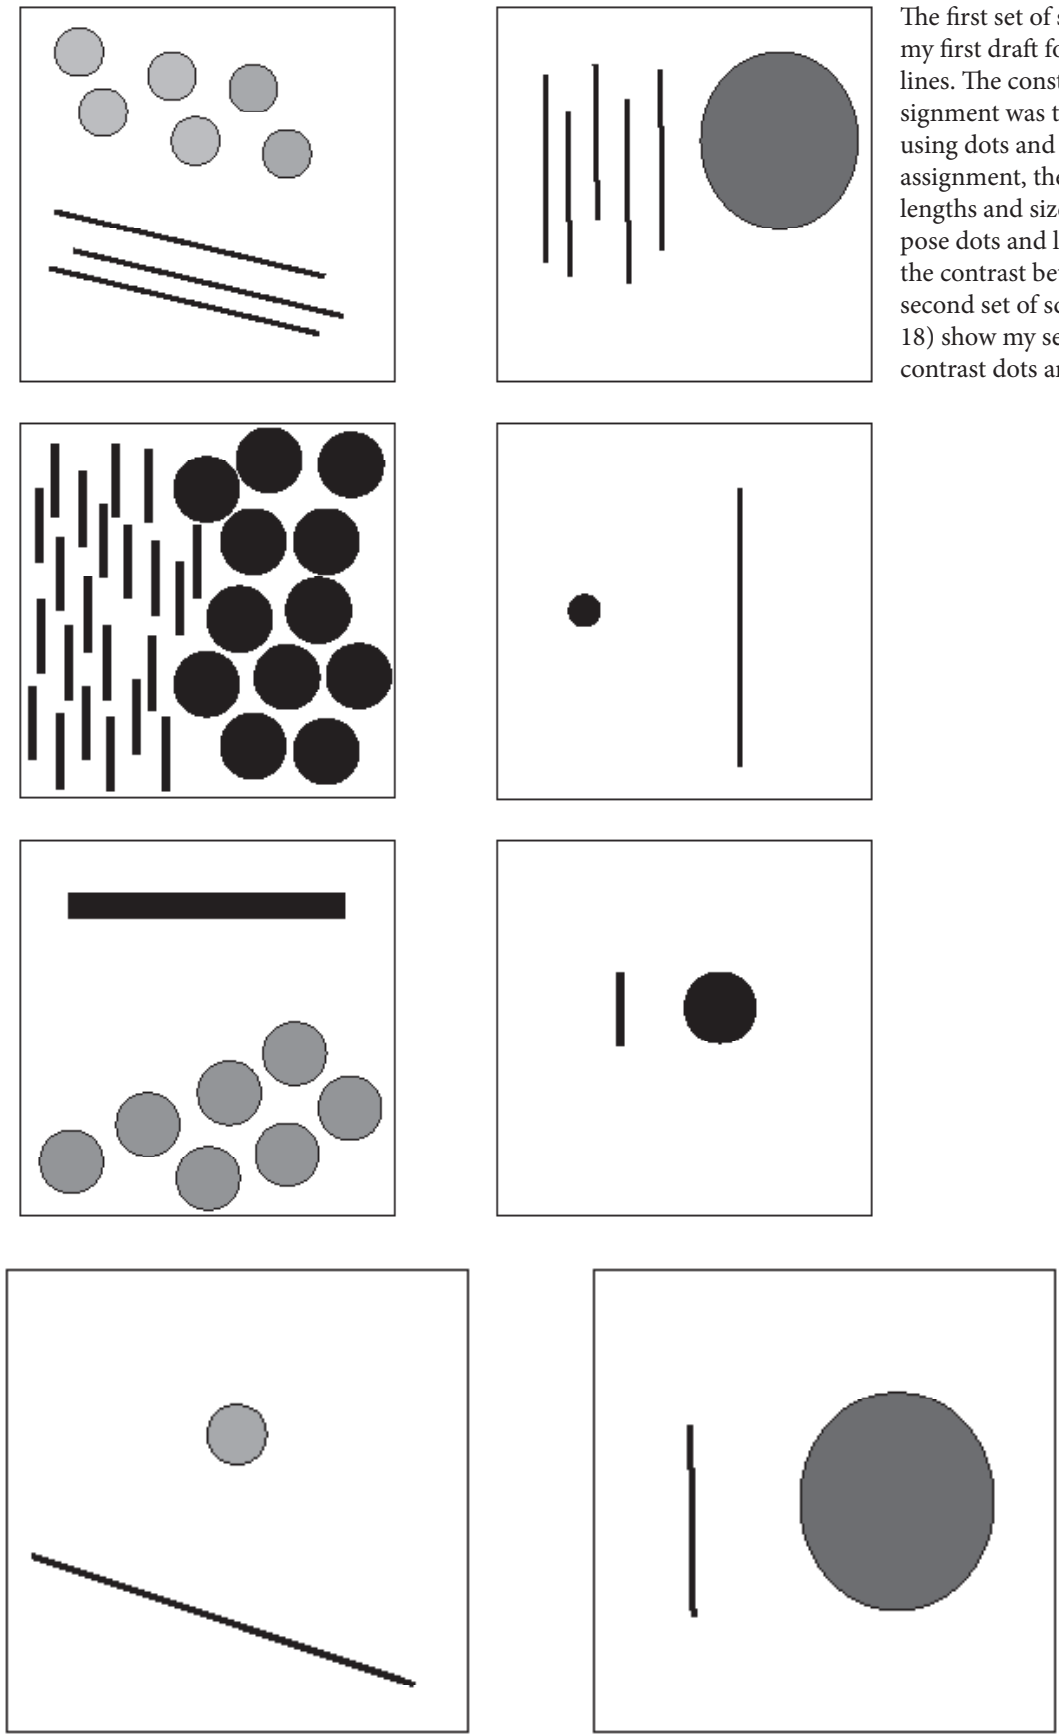

The first set of squares show my first draft for contrast lines. The constraint of this assignment was to show contrast only using lines. In this assignment, there are various lengths and sizes used to compose lines and show the contrast between them. The second set of squares (18 by 18) show my second draft for contrast lines.

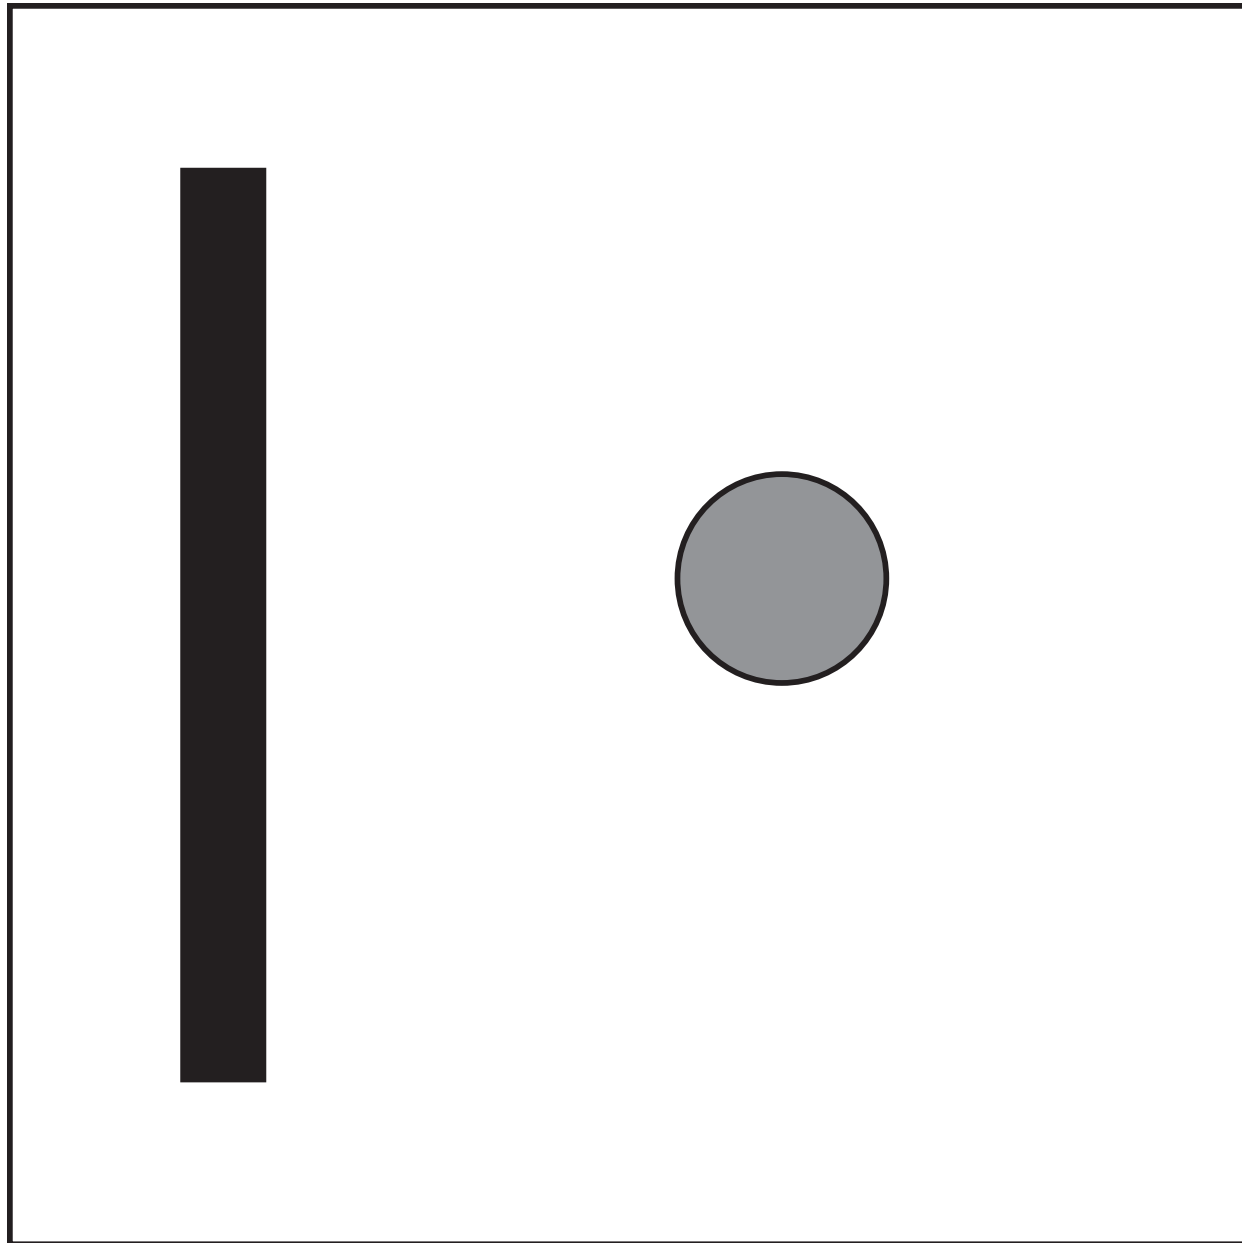

This is my final contrast lines assignment. There are two lines in this study. There is one very thick line and one thin line to show the contrast between them.

The first set of squares show my first draft for contrast dots lines. The constraint of this assignment was to show contrast using dots and lines. In this assignment, there are various lengths and sizes used to compose dots and lines and show the contrast between them. The second set of squares (18 by 18) show my second draft for contrast dots and lines.

This is my final contrast dots and lines assignment. There are two objects in this study. Contrast is shown using a thick line and a gray dot.

The purpose of this assignment was to take 5 screenshots of the film The Conformist directed by Bernardo Bertolucci and to draw red lines to practice our composition of symmetry.

Two out of five of these scenes need to be fixed. For instance, in the sanatorium scene the main visual axis is the horizontal in the middle of the frame, and in the exterior scene with the fence the main axis is two-thirds down the page.

China

In class, we picked a country that we wanted to visit and we had to pick 5 colors which is shown on the squares including black and white. My country of choice was China.

I thought the Conformist was filmed in an interesting way because the camera follows the characters in a fixed angle until the characters reach a certain destination or when the characters finish their scene. It feels like Bretolucci wants his audience to observe the scene and focus on that specific place at that moment.

China

Northeastern

Adding to our country color palette, we also did a color palette for Northeastern University.

China

Northeastern

Adding to our country color palette, we also did a color palette for Northeastern University. The sizes of the squares represent how much of the color we see on the Northeastern campus or on the photo of our country.

Color

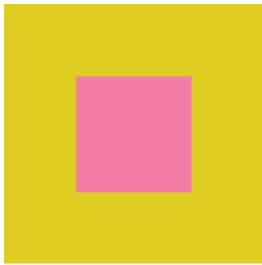

We also did a color grid to learn about hue and saturation. The first row is 25/75 color. The second row is 50/50 color. The third row is 75/25 color. The two squares represent the saturated colors and the gray scale representation.

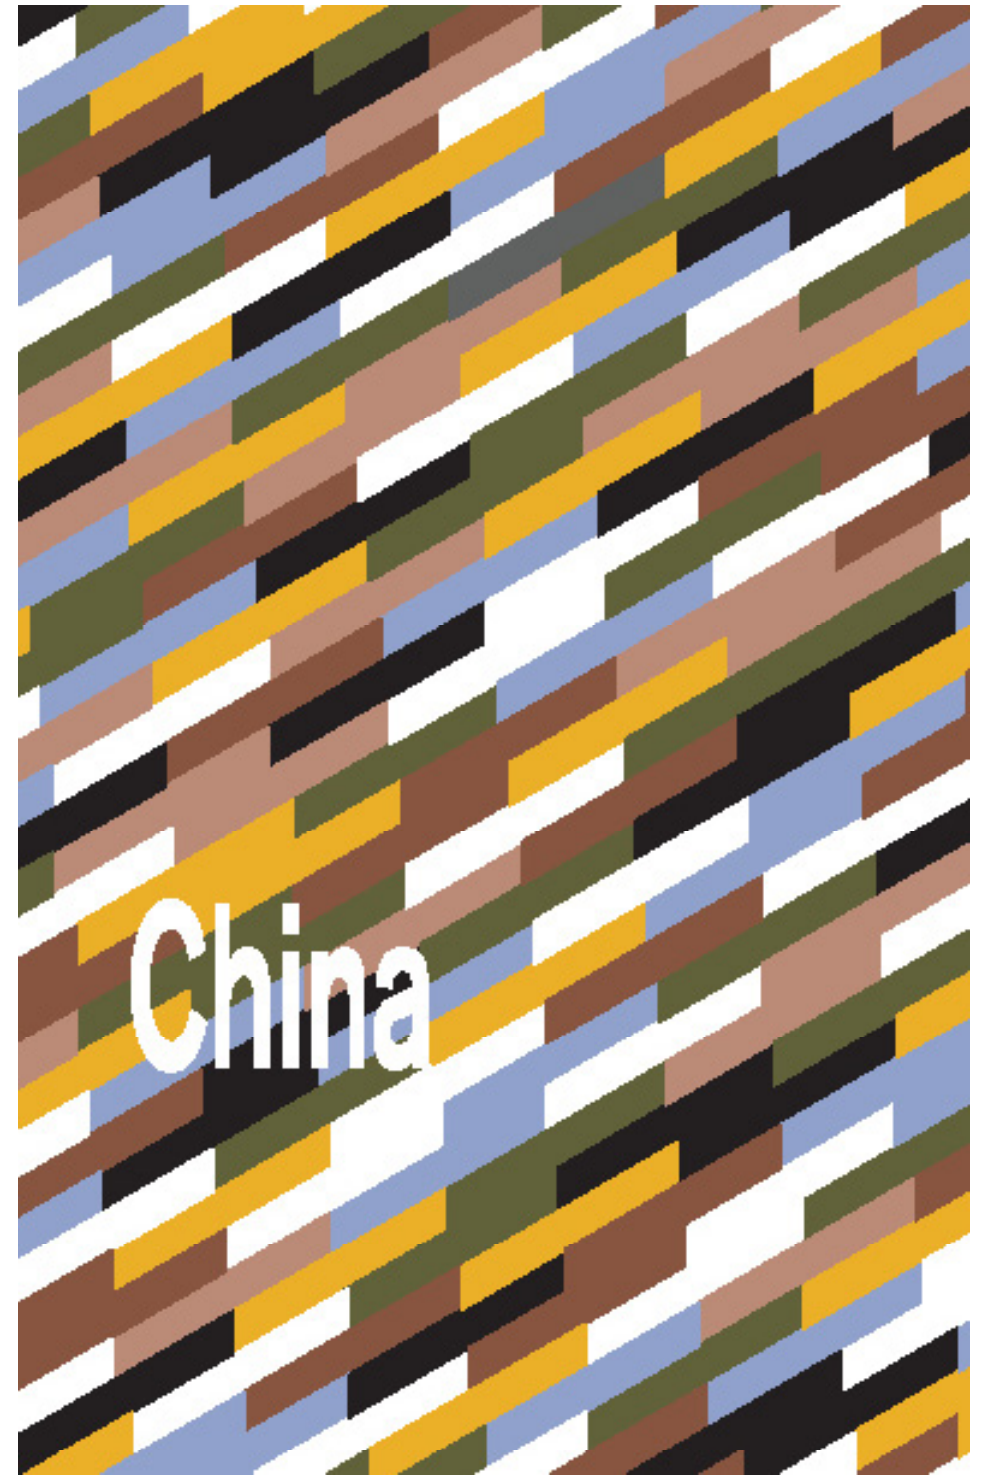

For this assignment, I had to work with colors. In this example, there are blue and yellow squares. Inside them, there are two red squares that look like they have the same shade of red, but they do not. This is shown on the underneath, the two red squares are placed right beside each other to show the difference. The other example shows two rectangles that are placed beside each other with two smaller squares on opposite sides. The two squares look like they have different shades of blue, but they are actually the same color. This exercise is completed 5 times.

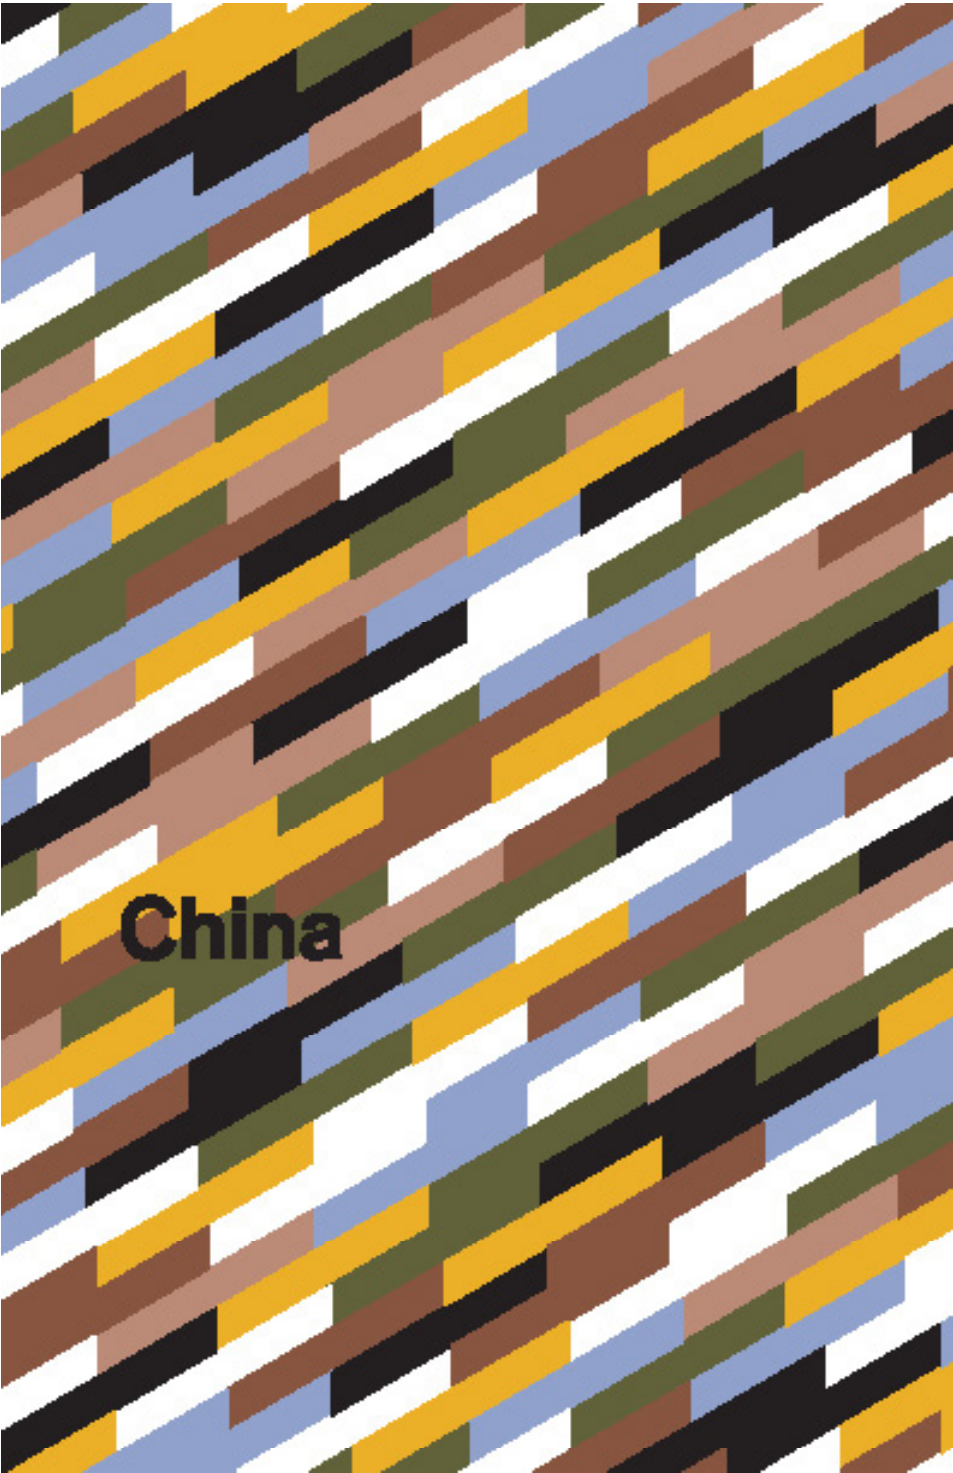

These diagonally placed rectangles are supposed to fill the page. The colors are taken from the country color palette.

White typefaced 'China' is placed on the page. I changed the size and color of the original text that was given.

This is the smaller version of my final country studies.

posi+ive

The purpose of this assignment was to learn about type by using words as images. This page focuses on adjectives.
The left page is my first draft. The right page is the final product.

CHAIR

NORTHNOSE

LOLLIPOP

faucet

REFLECTIONNONREFLECTION

CHRISTMAS

S□UARE

This page focuses on nouns. The left page is my first draft. The right page is the final product.

LOOK

FLOAT

STOP

LOVE

PA. / NT

LEAV E

FADE

This page focuses on verbs. The left page is my first draft. The right page is the final product.

For this poster assignment, we had to think of a issue that had a call to action. I initially chose abortion. My draft shows a girl, a pair of scissors, and a fetus. There is a line of words connecting them saying “my body, my choice.”

I decided to stray away from abortion and focus on a big debate between the hot dog issue. Is a hot dog a sandwich or not? I chose to draw a hot dog and write "NOT A SANDWICH" as the title. I was advised to use a photograph in my poster.

This is the second draft of my poster. I was advised to have a better background because it was difficult to see the hot dog. I was also advised to use a different type of bun for my hot dog.

Not a sandwich

This is the third draft of my poster. I used a black background and used white text.

Not a sandwich.

This is the smaller version of my final poster.

Not a sandwich.

This is the final version of my poster. I added a period to my sentence to add emphasis and used a serif typeface to add to the seriousness.

Country Studies: The text 'China' is placed on to the blocks of rectangles.
